SKILLS

Web Dev/Design, UI & UX Design, ASP.net MVC, C#, Ruby/Rails, AJAX, HTML5, JavaScript (OO,jQuery), CSS3, SQL, Agile, Scrum

WORK EXPERIENCE

Lead Web Developer (3/2010 – Present)

Genentech

Lead web development (client/server), user interface design, user experience design, and architecture efforts for internal applications used companywide in the production of biotech pharmaceuticals. Work within an Agile/Scrum team producing multiple applications simultaneously. Apply skills in web coding, UX, and design throughout the application development process, from the user interviews and creation of wireframes to UI design and coding. All skills listed above are used on a daily basis.

Award - Genentech Techie: A yearly award given to teams that demonstrate great technological achievement. Given for the WiseTrack application.

Lead Web Developer/Architect (4/2004 – 3/2010)

Charles Schwab & Co. Inc.

Lead at all phases of the development lifecycle from requirements gathering and analysis, implementation, testing and documentation of enterprise level, incentive reporting and transaction systems. Designed and developed complex web applications using ASP.NET 2.0, C#.net, DHTML, JavaScript, AJAX, Web Services, CSS, XML and XSLT. Designed functional user interfaces using Macromedia Fireworks and Adobe Photoshop. Performed data modeling, database design, and data analysis for SQL Server, Oracle, and Teradata.

Software Engineer (5/2003 – 11/2003)

Echelon Corporation

Created and updated requirements, test plans, user test scenarios, and test cases. Developed and maintained custom ASP.net test harness application. Analyzed and validated test results, identifying, evaluating, and reporting bugs. Worked closely with other team members to review functional specifications and test coverage. Performed black box, white box testing, and code reviews on ASP.net applications.

Web Developer (05/2002 – 05/2003)

Jump Interactive

Created rich interactive applications, many ecommerce, using ASP.NET, ASP, VBScript, JavaScript, XML, and MySQL. Built web applications from the ground up, leading all project management, requirement gathering, development, testing, and support.

Web Developer

(7/2001 – 05/2003)

MeritCare Health Systems

Designed user interfaces and coded web applications for MeritCare.com using many different programming languages and design concepts such as ASP, VBScript, JavaScript, HTML, DHTML, XML. Designed and developed databases using Microsoft SQL Server 2000 and Visual Studio.

EDUCATION

Bachelor of Science, Management of Information Systems
5/2002

North Dakota State University, Fargo, ND
AACSB International Accredited

Minors: Visual Art and Design, Computer Science
